

WOCOVA

9th World Congress on Vascular Access

15-17 APRIL 2026

VALENCIA SPAIN

**ALL
POSTERS**

- 208 - Clinical Outcomes of Ultrasound-Guided Peripheral Intravenous Catheter Placement in Patients with Systemic Sclerosis and Difficult Intravenous Access - **Mari Abe (JP)**
- 198 - Reducing Early PICC Dressing Failure Using a Haemostatic Dressing Strategy: A Randomised Controlled Trial - **Evan Alexandrou (AU)**
- 168 - The Burden of Peripheral Intravenous Catheter Failure in Older Hospitalised Patients - **Evan Alexandrou (AU)**
- 370 - Medical adhesive-related skin injury in chemotherapy patients: incidence and risk signals from a multi-year vascular access dataset - **Leo Andrew Almerol (GB)**
- 299 - Monitoring of short peripheral venous catheter (SPVC), MARSI Yes or No. Medical Clinic Period: April 2023 – December 2025 - **Cirlia Petrona Alvarez (AR)**
- 108 - Design and validation of a safety checklist for central venous catheter insertion in pediatric patients - **Daniela Alves (BR)**
- 85 - Enhancing peripheral intravenous catheter care: implementing an infection prevention bundle - **Kristine Amble (NO)**
- 381 - Impact of Implementing a Clinical Excellence Program in the Management of Vascular Access and Related Outcomes - **Andreia Amorim (BR)**
- 147 - What's happening in Canada - the updated CVAA Guidelines - **Alana Aquino (CA)**
- 340 - From price to value: clinical and economic impact of integrated versus non-integrated peripheral intravenous catheters (PIVC) in national health service (NHS) practice - **Maya Aquino-Guerrero (GB)**
- 126 - Transforming patient safety: a strategic initiative on accelerating national access to peripheral-iv-site monitoring technology for safer care across NHS England - **Maya Aquino-Guerrero (GB)**

105 - Paediatric vascular access through the ages – One centre's experience - **Sam Archer (GB)**

107 - Reflecting, again, on setting up a nurse-led paediatric PICC service. Looking back over the last 5 years. - **Sam Archer (GB)**

106 - The fate of PICCs in different patient groups: One centre's experience. - **Sam Archer (GB)**

132 - Cost-effectiveness analysis, hospital sustainability, and clinical outcomes related to the use of long peripheral catheters or PICC: A retrospective cohort study - **Jerusa Armani (BR)**

134 - Impact assessment of PICC tunneling using Kirschner wire in a pediatric population: A 5-year retrospective analysis in a private hospital in São Paulo, Brazil - **Jerusa Armani (BR)**

271 - Process Maturity in Peripheral Vascular Access Device Care: A Decade of Surveillance, Education, and Governance - **Jerusa Armani (BR)**

333 - The DIVAraba predictive tool for the management of difficult intravenous access. - **Victoria Armenteros-Yeguas (ES)**

114 - An Prospective Observational Study of Pediatric Peripheral and Central Venous Access Outcomes Using a Break-Away Securement Device - **Amit Bahl (US)**

403 - A Prospective Observational Study of Pediatric and Adult Peripheral Venous Access Outcomes Using a Break-Away Securement Device - **Amit Bahl (US)**

396 - Extravasation of vasopressors from a central venous catheter: a rare but serious complication - **Aleksandra Barabasz (PL)**

162 - Improving vascular access for paediatric surgical patients: A quality improvement project - **Alec Beaney (GB)**

355 - Association between the use of PICC-port on the same day it is inserted and early complications in cancer patients undergoing chemotherapy treatment. - **Rebeca Benítez González (ES)**

- 318 - Staff experience of an after-hours vascular access specialist team pilot project: a single-centre, cross-sectional survey - **Sarah Berger (NZ)**
- 398 - Femoral port implantation as a first choice in superior vena cava syndrome - **Jadwiga Bochynek (PL)**
- 297 - Implementation of a FICC-Port in a Patient with Superior Vena Cava Thrombosis - **Jose Antonio Brito Hernández (ES)**
- 128 - Reimagining Vascular Access: Nursing Innovation and Excellence - **Uleta Bruny-Fils (US)**
- 327 - Haemocompatibility testing of catheter materials in ex vivo human blood indicates activation of coagulation and haemolysis in the presence of chlorhexidine coatings - **Andrew Bulmer (AU)**
- 242 - The Current State of US Pediatric Vascular Access Care Delivery from the Perspective of Key Stakeholders – A Qualitative Study - **Alina Burek (US)**
- 276 - Efficacy of cyanoacrylate tissue adhesive in preventing adverse events related to PICCs in preterm newborns - **Patricia Camargo (BR)**
- 22 - Analyzing Midline and UGPIV Catheter Utilization Trends (2021-2024) - **Jona Caparas (US)**
- 23 - Challenges and Success Rates of Ultrasound-Guided IV Insertion(UGPIV) In Emergency and Critical Care Settings - **Jona Caparas (US)**
- 387 - Midline Optimization: Quantifying the Five-Year Clinical and Financial Impact of the VAT UGPIV Guidance Protocol (2021–2025) - **Jona Caparas (US)**
- 137 - Comparative Study of the Ocado and Modified Ocado Methods for Achieving Accurate Cavoatrial Junction Placement in Peripherally Inserted Central Catheters (PICCs) - **Roxanne Canicula (US)**
- 274 - PICC Securement in Patients With Catheter-Associated Skin Injury (CASI): Subcutaneous Anchoring as an Alternative to Adhesive Devices - Viviane **Ferreira Cesar (BR)**

- 225 - Central catheter related right atrial thrombus (CRAT) - **Jiri Charvat (CZ)**
- 209 - Experience with long peripheral catheter in DIVA patients – the significance of ultrasonography - **Jiri Charvat (CZ)**
- 226 - The impact of independent vascular access team - **Jiri Charvat (CZ)**
- 272 - Dynamics of Fibroblastic Sleeve Formation on Port-Catheters: An Experimental Study on Pigs - **Vendelin Chovanec (CZ)**
- 371 - Sharp recanalization of symptomatic central vein occlusion using re-entry device: A case report - **Vendelin Chovanec (CZ)**
- 139 - Alternative catheter locking solutions in paediatric cancer care: strategies for successful implementation - **Elouise Comber (AU)**
- 306 - Saskatchewan's First Percutaneous Arteriovenous Fistula Program: Outcomes of a Multidisciplinary Model Delivering Innovative Hemodialysis Access in a Smaller Canadian Province - **Jennifer Culig (CA)**
- 193 - Embedding Ultrasound-Guided Vascular Access Education into Phase 1 Clinical Research Practice: A Workforce Capability Model - **Melita Cummings (AU)**
- 93 - Optimising vascular access in clinical trials: A feasibility study of ultrasound-guided midline catheter insertion in tattooed participants and long-term study cohort - **Melita Cummings (AU)**
- 181 - Do we always choose the best CVAD? An evaluation of satisfaction with central venous access device placement in paediatric onco-haematology patients. - **Jaroslav Čutura (SK)**
- 374 - Association between the use of short-term central catheters in a Brazilian intensive care unit and clinical outcome: a cross-sectional study - **Vanessa de Paula (BR)**
- 363 - Characterization of totally implanted central venous catheter use in hospitalized adolescents: a descriptive study - **Vanessa de Paula (BR)**

- 254 - Effectiveness of tissue adhesive for securing paediatric venous access devices: a systematic review and meta-analysis - **Sabrina de Souza (AU)**
- 170 - SISIPUSH: evaluation of hemoysis and iatrogenic anemia using the push-pull method to obtain blood from pediatric patients with Central Venous Access Devices - **Mieke Debrauwere (BE)**
- 192 - From repeated access to vascular exhaustion: The impact of multiple punctures in pediatrics - **Lucía Del Pozo-Calvo (ES)**
- 266 - Ultrasound Quantification of Flow Dynamics During Peripheral Intravenous Catheter Flushing: A Simulation-Based Study - **Jiaxin Deng (IE)**
- 244 - Believe in mini-midline: a case series from a pediatric tertiary hospital - **Veronica Diotto (IT)**
- 273 - Cost-Effectiveness Analysis of Long Peripheral Catheters Compared With Peripherally Inserted Central Catheters - **Maria Lucia dos Santos (BR)**
- 200 - Vascular Access Education for nurses in the Czech Republic - **Martina Douglas (CZ)**
- 263 - Procedural and therapy peripheral intravenous catheters: a pragmatic framework to improve safety, quality and patient-centred care. - **Bertrand Drugeon (FR)**
- 293 - From PICC Expertise to PICC-Port Implantation: A Structured Nurse-Led Pathway for Vascular Access Care - **Erika Stephanie Espinel Armas (IT)**
- 304 - Salvage of thrombosed vascular accesses for haemodialysis: a single-centre retrospective comparison of endovascular and surgical techniques - **Blanca Expósito Camacho (ES)**
- 339 - Real-world implementation capacity of vascular access specialist teams in Spain - **Ismael Fernández Fernández (ES)**

159 - Clinical outcomes of 297 PICC-ports implanted in cancer patients: a retrospective cohort study - **Pascal Fangio (FR)**

91 - Comparative safety of PICC-ports and chest ports in oncology : A monocentric retrospective cohort study - **Pascal Fangio (FR)**

346 - FleboCardGame: gamifying phlebitis assessment to improve peripheral intravenous catheter safety - **Acássio Ferreira de Holanda (BR)**

364 - Low-cost peripheral intravenous access simulator: expanding vascular access training in resource-limited settings - **Acássio Ferreira de Holanda (BR)**

133 - Promoting the selection of the ideal venous device by nurses in a tertiary hospital in São Paulo, Brazil: an evidence-based practice implementation project - **Emerson Oliveira (BR)**

378 - Factors influencing peripheral venous catheter longevity: flushing technique, syringe volume, and intraluminal pressure - an in vitro observational study - **Linda Fridenberga (LV)**

380 - Vascular Access Device Use in Pediatric Inpatient Care: Quality Monitoring – The Children's Clinical University Hospital (BKUS) Experience - **Linda Fridenberga (LV)**

194 - Moving the needle: A 3-year quality improvement project in expanding confidence in ultrasound-guided peripheral intravenous cannulation amongst PGY-1 Doctors in a rural Irish hospital - **Graham Gallagher (IE)**

343 - Clinical Activity of an Infusion and Vascular Access Team in a Regional Hospital: 2025 Experience - **Juan Manuel García Garrido (ES)**

367 - Current Landscape of Vascular Access Devices in Tunisia: A Multicenter Practice Audit - **Montassar Ghalleb (TN)**

334 - Morbidity of installation of an implantable catheter port: a prospective monocentric study conducted in LMIC settings - **Montassar Ghalleb (TN)**

290 - Improving patient safety through key performance indicators for Vascular Access: Benchmarking Cambridge University Hospitals Vascular Access Unit performance - **Maria Giannakopoulou (GB)**

362 - Complications associated with totally implanted central venous catheter implantation in an adolescent with leukemia: a case report from a Brazilian public health service - **Helena Ferraz Gomes (BR)**

366 - Microbiological analysis of the skin of patients undergoing peripherally inserted central catheter implantation in a Brazilian public health service: a cross-sectional study. - **Helena Ferraz Gomes (BR)**

359 - Skin lesions associated with peripherally inserted central catheters in a public service: a case series - **Helena Ferraz Gomes (BR)**

201 - Temporal evolution of vascular access devices in an intensive care unit: an observational time series study - **Sonia Gomis-Baldoví (ES)**

261 - Pre-Antisepsis Cutaneous Colonization at the PICC-Port Insertion Site as a Predictor of Reservoir Infection - **Antonio González-Alarcón (ES)**

354 - Oncology and Haematology Patients with Medical Adhesive-Related Skin Injuries: A Prospective Descriptive Study - **Laura Gonzalez-Blas (ES)**

151 - Improving Foundation Year 1 doctors' confidence in ultrasound-guided peripheral IV cannulation: pre/post evaluation of a practical teaching session - **Sohil Gudka (GB)**

419 - Antimicrobial Catheter Technologies: From Chemistry and Manufacturing to In-Vivo Performance - **Nisha Gupta (US)**

407 - Translational Blind Spots in Hemocompatibility Assessment of Intravascular Devices - **Nisha Gupta (US)**

344 - Evaluating midline catheter tip positioning in the mid-subclavian vein: insights from 2024–2025 - **Magdalena Gwiazda (GB)**

331 - Evaluation of Nursing Practices in the Handling of Totally Implantable Venous Access Devices: A Descriptive Study - **Mahmoud Hakim (TN)**

431 - Use of KiteLock 4% in treating central-line associated bloodstream infection (CLABSI) - **Rachel Elizabeth Hankey (GB)**

155 - Outside the Protocol: Real-World Challenges in Paediatric Vascular Access - **Šárka Havelková (CZ)**

255 - Building and Implementing a Multidisciplinary Team (MDT) for Vascular Access Led by Advanced Practice Vascular Access Nurses - **Hua He (CN)**

415 - Experiencia de enfermería en la colocación de catéteres de línea media mediante ultrasonido en un Hospital General de la Ciudad de México. - **Gilberto Hernandez Córdoba (MX)**

397 - Vascular Access in the forearm. The next step after failure of distal radiocephalic fistula - **Miguel Ignacio Herrero Marco (ES)**

230 - Catheter-related Staphylococcus aureus bloodstream infections in a Norwegian university hospital: a one-year observational study - **Lise Husby Høvik (NO)**

246 - Right arm compartment syndrome in a hemodialysis patient with a contained pseudoaneurysm of the brachio basilic fistula. - **Albana Kenga (AL)**

305 - Late Spontaneous Internal Jugular Vein Perforation Related to PICC-Port Migration: A Rare Vascular Access Device Complication - **Jakub Kletečka (CZ)**

251 - DIVA Scales: What has worked and What has not? - **Kathy Kokotis (US)**

145 - Eye on the Line: A Surveillance Program to Reduce Risk in Neonates - **Kimberly Kristoff (US)**

352 - Analysis of reasons for vascular access removal, 2024-2025 - **Alexia Larrondo González (ES)**

- 90 - Initial clinical outcomes of the first nurse-inserted peripherally inserted central catheters in Poland - **Maciej Latos (PL)**
- 120 - Algorithms, Tools, Technology and Artificial Intelligence for the Use in Peripheral Intravenous Catheter Vein Selection: A Search for Teaching Methods, Clinical Adoption, Competency and Retention. - **Michael Liddelow (AU)**
- 166 - Comparison of Vein Selection of a Novel Ultrasound-Based Vein Visualization Device and Traditional Landmark Technique - **Michael Liddelow (AU)**
- 216 - Discrepancies Between Patient-Reported Discomfort and Clinical Documentation in Postoperative Care of Central Venous Catheters After Surgery: A Prospective Descriptive Study - **Maria Lithner**
- 210 - Transhepatic Ultrasound-Guided Tip Confirmation of Femoral Central Venous Catheters: A Single-Operator Technique - **Ferdinando Longo (IT)**
- 213 - Analysis of peripherally inserted central catheters in the Spanish critical care units: Results From PICC-ICU Survey - **Juan Manuel López-Reina Roldán (ES)**
- 279 - Complications Related to Pseudo-Tunneled Peripherally Inserted Central Catheters in Onco-Hematological Patients: A Quasi-Experimental Comparative Study. - **Selene Lurueña Rodríguez (ES)**
- 92 - Adherence to Limb Functional Exercise in Pediatric Cancer Patients with PICC Lines: A Hybrid Concept Analysis - **Guiyuan Ma (CN)**
- 196 - Research on the Construction of User Profiles for the Compliance of Limb Function Exercises in Children with Cancer Undergoing PICC Catheterization - **Guiyuan Ma (CN)**
- 87 - Systematic review on the adherence of limb function exercises for patients with PICC catheter placement - **Guiyuan Ma (CN)**
- 420 - Anesthesia-Sparing Strategy for Port-a-Cath Implantation in a Pediatric Pompe Disease Patient: A Case Report - **Pietro Maglio (IT)**

189 - Increasing Vein Preservation in the NICU using Extended Dwell Peripheral IVs - **Jessica Marchetti (US)**

95 - From Superior Vena Cava Syndrome to Femoral Access: A Case of Successful Management of Central Venous Obstruction in an Oncology Patient. - **Raquel Martínez-Muntó (ES)**

349 - Radial Arterial Catheterization: Effectiveness of Ultrasound Guidance in Nursing Practice - **Leire Mauleon (ES)**

303 - Efficacy and safety of mini-midlines, midlines and PICCs in a pediatric surgical hospital in uganda: a prospective study - **Alessandro Mazza (IT)**

291 - Sustainability in an NHS Vascular Access Department - **Joanne McGee (GB)**

258 - Implementing Extravasation Management strategy Through Multidisciplinary Collaboration in Pediatric and Neonatal Care: A Tertiary Hospital Experience. - **Jennifer Mendes (QA)**

205 - Material-related arterial line insufficiency: implications for education and device selection in cardiovascular ICUs - **Kimito Minami (JP)**

227 - Experience with tunneled CICC as an elective central venous catheter during hospitalization - **Dana Mokra (CZ)**

372 - pH and osmolarity of antibiotics administered via elastomeric pumps in OPAT: implications for venous tolerance and catheter choice - **Virginie Moulin (CH)**

270 - Standardizing aseptic practice in ultrasound-guided peripheral IV insertion using an integrated probe barrier: a quality improvement initiative - **Nancy Moureau (US)**

206 - Femoral PICC Insertion for Germ Cell Tumour Patients with Mediastinal Mass and SVC Compression: A Safe and Effective Alternative for ambulatory patients receiving chemotherapy. - **Gema Munoz-Mozas (GB)**

393 - Complications of implantable chemotherapy ports a single centre experience - **Rares Munteanu (RO)**

189 - Increasing Vein Preservation in the NICU using Extended Dwell Peripheral IVs - **Jessica Marchetti (US)**

95 - From Superior Vena Cava Syndrome to Femoral Access: A Case of Successful Management of Central Venous Obstruction in an Oncology Patient. - **Raquel Martínez-Muntó (ES)**

349 - Radial Arterial Catheterization: Effectiveness of Ultrasound Guidance in Nursing Practice - **Leire Mauleon (ES)**

303 - Efficacy and safety of mini-midlines, midlines and PICCs in a pediatric surgical hospital in uganda: a prospective study - **Alessandro Mazza (IT)**

291 - Sustainability in an NHS Vascular Access Department - **Joanne McGee (GB)**

258 - Implementing Extravasation Management strategy Through Multidisciplinary Collaboration in Pediatric and Neonatal Care: A Tertiary Hospital Experience. - **Jennifer Mendes (QA)**

205 - Material-related arterial line insufficiency: implications for education and device selection in cardiovascular ICUs - **Kimito Minami (JP)**

227 - Experience with tunneled CICC as an elective central venous catheter during hospitalization - **Dana Mokra (CZ)**

372 - pH and osmolarity of antibiotics administered via elastomeric pumps in OPAT: implications for venous tolerance and catheter choice - **Virginie Moulin (CH)**

270 - Standardizing aseptic practice in ultrasound-guided peripheral IV insertion using an integrated probe barrier: a quality improvement initiative - **Nancy Moureau (US)**

206 - Femoral PICC Insertion for Germ Cell Tumour Patients with Mediastinal Mass and SVC Compression: A Safe and Effective Alternative for ambulatory patients receiving chemotherapy. - **Gema Munoz-Mozas (GB)**

393 - Complications of implantable chemotherapy ports a single centre experience - **Rares Munteanu (RO)**

- 240 - Clinical Audit of PICC and Midline Management: Identifying Quality Gaps and Advancing Best-Practice Implementation - **Baudolino Mussa (IT)**
- 103 - Development of a Predictive Scale (D.A.L.T.E.) for MARSI Prevention in Oncological Patients with Vascular Access - **Baudolino Mussa (IT)**
- 239 - Extended Dressing Intervals for PICC Management in Oncohematologic Patients: Safety and Patient Satisfaction Study - **Baudolino Mussa (IT)**
- 237 - Nursing Consultancy in Vascular Access Management: Defining Professional Role, Competencies and Organizational Impact - **Baudolino Mussa (IT)**
- 238 - Proactive Assessment of Peripheral Venous Heritage: Standardized Approach to Appropriate Vascular Access Device Selection - **Baudolino Mussa (IT)**
- 98 - Psychological Impact of Central Venous Catheters in Home Total Parenteral Nutrition Patients - **Baudolino Mussa (IT)**
- 102 - Ultrasound-Guided vs. Blind Venipuncture in Difficult Access Patients: A Prospective Multi-Center Observational Study in Emergency Settings - **Baudolino Mussa (IT)**
- 100 - Vascular Access in Major Burn Patients: Development of a Decision-Making Algorithm for Device Selection and Management - **Baudolino Mussa (IT)**
- 101 - VascularCare: A Mobile App Proposal for Integrated Home Management of Vascular Access Devices - **Baudolino Mussa (IT)**
- 309 - Design and development of a predictive risk scale for the preventive management of Medical Adhesive-Related Skin Injuries (MARSI) in oncological patients with vascular access devices - **Baudolino Mussa (IT)**
- 149 - Medication knowledge and vascular access decisions: A Canadian perspective - **Kristie Naayer (CA)**
- 408 - Vasopressor administration in various vascular access (VIVVA): a multicenter two-phase observational study to investigate vasopressor-related practices and outcomes - **Barb Nickel (US)**

- 212 - Closed-loop flushing to restore patency of a citrate-locked dialysis catheter obstructed by intraluminal precipitates: a case report - **Julita Orankiewicz (PL)**
- 399 - Outcomes of an Interdisciplinary Vascular Access Program as a Patient Safety Strategy at Fundación Cardioinfantil – LaCardio (2020–2025) - **Marcela Parra Medina (CO)**
- 418 - Thrombosis Associated with Long-Term Central Venous Catheters - **Margarida Pascoal (PT)**
- 199 - "FIDLINE": a femorally inserted peripheral venous catheter. A last resort catheter: our experience. - **Giovanna Passaro (IT)**
- 75 - Transverse and longitudinal incision in the creation of a PICC-port pocket: which approach should be used? - **Massimo Patimo (IT)**
- 315 - Missed care and safety incidents in vascular access: An integrative review to support the development of MISSCARE-IV - **Mavilde Pedreira (BR)**
- 316 - Physicochemical stability of alcohol-based chlorhexidine solutions: A scoping review - **Mavilde Pedreira (BR)**
- 228 - Hemostatic discs exhibit broad-spectrum antimicrobial activity against pathogens linked to vascular access device infections - **Elise Pelzer (AU)**
- 390 - Observational retrospective study confirms safety, performance and utility of an antimicrobial/antithrombogenic peripherally inserted central catheter in adults and pediatric patients - **Thomas Philbeck (US)**
- 264 - Ultrasound-Guided n-PICC Insertion in Neonates with Difficult Intravenous Access: A Feasible and Less Traumatic Strategy - **Fiammetta Piersigilli (BE)**
- 177 - Internal length estimation of neonatal PICCs: a scoping review of methods, definitions, and clinical practice - **Wouter Pieteraerens (BE)**
- 36 - Vascular Access in the morbidly obese: use of a spinal needle, a case report and review - **Francisco Javier Pinto Espinosa (CL)**

- 285 - Implementation of Superficial Femoral Midline Catheters: A Vascular Access Team-Driven Experience from a Polish Academic Hospital - **Agnieszka Piróg (PL)**
- 277 - Secondary Malposition of a FICC-Port : A Case Report - Genesio Puzio (IT)
- 141 - The I-DECIDED device assessment and decision tool: qualitative findings - **Gillian Ray-Barruel (AU)**
- 131 - Extended maintenance intervals for peripherally inserted central catheters (PICCs) in oncology: a retrospective audit of infection outcomes - **Princell Regis (GB)**
- 218 - Comparative Cost-Effectiveness Analysis of Securacath vs. Stat-Lock in a Pediatric Oncology Case Series - **Rodrgio Ribeiro (BR)**
- 39 - Ultrasound-Guided Subcutaneous Tunneling of Femoral Central Catheters in Pediatric Patients: An Innovative Nursing Practice - **Cintia Riograndese (BR)**
- 40 - Increasing Success in Pediatric Peripheral Venous Access: Ultrasound Guidance in Children with Difficult Venous Access - **Cintia Riograndese (BR)**
- 42 - Safety and Efficacy of Dual-Lumen PowerPICC 5Fr for Pediatric Hematopoietic Stem Cell Transplantation: A Case Series - **Cintia Riograndese (BR)**
- 43 - Optimizing PICC patency: advanced nursing strategies for effective reversal of catheter occlusion. - **Cintia Riograndese (BR)**
- 341 - Institutional variability in vascular access device selection, dwell time and complications: a multicenter cohort study - **Miguel Ángel Rodríguez Calero (ES)**
- 220 - Clinical Characteristics and Complications of Long-Term Central Venous Catheters in Pulmonary Hypertension: A 10-Year Case Series (2016–2025) - **Carlos Fernando Roman Ortega (CO)**
- 110 - "Breaking Barriers: Accelerating Ultrasound-Guided PIV and Midline Insertions to Improve Patient Care" - **Lynette Romanovitch (US)**
- 76 - Venous Response to Tourniquet Pressure in Children: Implications for Peripheral Intravenous Access - **Karl Rönnegård (SE)**

- 156 - Piccine during neoadjuvant therapy - Frequency of thrombosis and quality of life - **Elisabeth Ryd Ausén (SE)**
- 295 - Clinical, organizational and satisfaction-related outcomes of a territorial management model for cancer patients with PICC - **Manolo Pietro Sala (IT)**
- 97 - Nurse anesthetist-performed PICC insertion: A prospective longitudinal study in a Norwegian hospital - **Mona Sand Andersen (NO)**
- 195 - Humanization in vascular care: midline catheter in a patient with difficult venous access - **Montserrat Sanchez Aguilera (ES)**
- 175 - PICC-PORT removal: indications, technique, and outcomes in clinical practice - **Montserrat Sanchez Aguilera (ES)**
- 234 - Ultrasound-guided axillary and femoral vein cannulation as an alternative for high-flow catheter insertion in neonates: An observational and retrospective study - **Maria Lucia Santos (BR)**
- 385 - Innovating Vascular Access in Resource-Limited Settings: An Experiential Report from Uganda - **Jennifer Semambo (US)**
- 164 - A marble house constructed by indwelling a totally implantable venous access port for 11 years - **Tae-Seok Seo (KR)**
- 124 - Development of a new polyurethane catheter for peripheral intravenous catheterization to reduce phlebitis risk: an ex vivo study - **Takuto Shimizu (JP)**
- 18 - Vascular access impact on mortality in elderly incident hemodialysis patients - **Eliana Silva (PT)**
- 38 - Designing an Infusion Therapy Teaching Program to Enhance the Teaching-Learning Process of Nursing Student - **Juliany Lino Gomes Silva (BR)**
- 320 - Antimicrobial bathing for the prevention of central line-associated bloodstream infections in non-intensive care units: a scoping review - **Thiago Silva (AU)**

- 186 - Expanding access to vascular care: A collaborative PICC training model to support rural Canadian communities - **Sara Smees (CA)**
- 153 - The space between evidence and reality: The guidelines say one thing and the street says another - **Sara Smees (CA)**
- 413 - Enhancing Learning Outcomes and Promoting Safer Practices Across the Care Continuum With Intra-Venous Catheter Insertion using Aseptic Non Touch Technique (ANTT™). - **Rawane Soboh (CA)**
- 414 - Introducing Ultrasound Guided Peripheral IV Insertion to Nursing Students Through a Student Led Workshop - **Rawane Soboh (CA)**
- 338 - Resolution of PICC Line Entrapment by Fibrin Sheath in the Left Brachiocephalic Vein - **M. Jose Solaeta (ES)**
- 257 - Totally Implanted Venous Access Devices: Complications, Clinical and Sociodemographic Profile in Patients with PICC-PORT and CHEST- PORT Devices within a 2023–2025 Cohort - **Vicenta Sabel Solaz Martinez (ES)**
- 386 - Economic-Financial Feasibility and Productivity Increase: A Sustainable Strategy for Expanding Vascular Access Teams (PICC) - **Andreia Sousa Amorim Oliveira (BR)**
- 191 - Review of tunneled non cuffed femorally inserted central catheters at Royal Manchester Children’s Hospital - **Gary Swift (GB)**
- 311 - Safety and effectiveness of midline catheters for chemotherapy administration in hematological patients: a single-center retrospective study - **Artur Szymczak (PL)**
- 423 - Risk factors for vascular access devices self-removal in non-intensive care unit departments: a monocentric retrospective observational study - **Alba Taino (IT)**
- 430 - What do we know about vascular access infections? Results from a National survey of physicians and nurses. - **Alba Taino (IT)**

125 - Performance of a Bedside PICC Insertion Technique : A Simple Approach to Prevent Catheter Malposition - **Daisuke Takeuchi (JP)**

353 - LATE migration of the tip of a double-lumen Peripherally Inserted Central Catheter (PICC): a case report. - **Pilar Tejero Ariño (ES)**

58 - Time efforts, waste generation and risks associated with the replacement of single components of a typical infusion setup - **David Thallman (DE)**

174 - Recreational workshop to reduce anxiety in children with vascular access - **Eugenia Trigoso (ES)**

369 - Insertion of intra arterial catheters (IAC) in (pre)term neonates using ultrasound guidance. - **Robin van der Lee (NL)**

307 - Implementation of a decision flowchart for the management of phlebitis and infiltration/extravasation in a neonatal intensive care - **Andréa de Oliveira Vieira (BR)**

302 - "Catheter Day" Initiative: A Multidisciplinary Strategy to Eliminate CLABSI in a Neonatal Intensive Care Unit - **Andréa de Oliveira Vieira (BR)**

310 - Balancing Thrombosis and Bleeding Risk in Extensive Catheter-Related Deep Vein Thrombosis: A Case Report - **Magdalena Voinič (PL)**

32 - Developing an Evidence- and Consensus-Based Tool for Assessing Skin Impairments Associated with Central Venous Access Devices - **Grace Xu (AU)**

400 - Use of Peripherally Inserted Central Catheters in Pediatrics: What Does Our Experience Reveal? - **Elenia Yamashiro (BR)**

267 - Creation and Accreditation Process of a Vascular Access Team (VAT): An Institutional Nursing-Led Experience - **Montserrat Zapater Bas (ES)**

432 - Central venous catheters misplaced in lateral thoracic vein: A systematic literature review based on case reports. - **Xiaoxia Zhang (CN)**

404 - Right-sided infective endocarditis associated with an implanted venous port in a patient with refractory acute myeloid leukemia awaiting rescue allogeneic hematopoietic stem cell transplantation - **Barbara Ziobrzynska (PL)**

321 - The Hierarchical Escalation of Vascular Access in Nijmegen Breakage Syndrome. – Case Report - **Przemyslaw Zuchnik (PL)**
